# Bio-Oxygen® Carpet

## A Superior Carpet Cleaning System

When carpet is exposed to foot traffic, it accumulates both soil and microbial spores. It is important to maintain the carpet through routine vacuuming but also to periodically deep clean the surface to remove embedded bio contaminants that in periods of moisture may create odors or stains.

Artemis Bio-Oxygen® Carpet is a new class of extremely safe, non-toxic, ultra-powerful carpet detergent that hygienically cleans, removes bacteria, spores, mold and mildew with unprecedented efficacy. It can be used in typical carpet cleaning machines or steam extractors by mixing the two-parts together in the soap compartment.

## Features and Uses

- “Hygienically” Cleans Carpet
- Can be used in any type of carpet cleaning equipment
- Assists in remediating water damaged carpets\* (saves replacement costs)
- Assists in eliminating odors by oxidizing the molecules that cause them.
- Effectively removes soot, smoke, bacteria, mold spores and allergens
- Deters Microorganism Re-Growth
- Removes microbiological stains, including mold and mildew.
- Available in convenient 4 quart case or 4 gallon case
- Complete directions on label
- \* Non Sewage based floods

## Wide Range Of Uses

- |                          |                         |                       |                                  |
|--------------------------|-------------------------|-----------------------|----------------------------------|
| • Health Care Facilities | • Restaurants           | • Health clubs        | • Remediation projects           |
| • Nursing Homes          | • Schools, Universities | • Automobiles         | • Any place where there's carpet |
| • Day care facilities    | • Cruise ships          | • Boats, Yachts, RV's |                                  |
| • Veterinary clinics     | • Casinos               | • Institutions        |                                  |
